Bachelor of Science in Nuclear Medicine

Program Overview

The 18-month (6 quarters) continuous Nuclear Medicine program provides didactic and clinical education in Nuclear Medicine. The program prepares students to use high-tech equipment and radioactive tracers in the physiological assessment of various organ systems. The Program combines the didactic classroom theoretical concepts with clinical education at various hospitals and clinics throughout Northern California to fully integrate the student's experience in the exciting field of Nuclear Medicine Technology.

Program participants can expect substantial off-campus study and preparation for classroom lecture and lab exercises.

Nuclear Medicine Technologist Duties

The Nuclear Medicine Technologist uses high-tech equipment and radioactive tracers to study the function of the various organ systems. This includes imaging the progress of disease, as well as treatment of disease. The technologist is responsible for quality control of equipment and radiation safety practices in the hospital or clinic.

Tuition: $21,366.00

The Kaiser Permanente School of Allied Health Sciences is accredited by the WASC Senior College and University Commission (WSCUC).
