## **Facilitator**

You may contact a member of the KPSAHS Instructional Innovation and Digital Learning (IIDL) Department using this email: KPSAHS-academiconlinehelp@kp.org.

# **Course Description**

This is a six week online only course. You can access the course at any time within the six weeks. It is recommended that you use a computer. You can try the course on your mobile devices, but it is advised to use tablets or computers because smartphones have small screen sizes.

This course has a facilitator that will email you updates throughout the six weeks. There is no actual instructor for this course because it is all online and presentations are pre created.

This course presents the fundamental concepts of a pre-algebra course. Students will be introduced to whole numbers, fractions and decimals, integers, order of operations, percent, signed numbers, measurements, geometry, probability, and basic algebra concepts.

## **Course Outcomes**

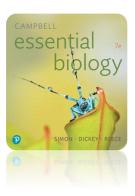

At the end of this course, students will be able to:

- Demonstrate an understanding of the principles of scientific inquiry.
- Demonstrate the ability to think critically and employ critical-thinking skills.
- Read and interpret models, graphs, and data.
- Demonstrate the quantitative skills needed to succeed in biology.
- Demonstrate an understanding of the impact of science on society.
- Evaluate the credibility of scientific information from various sources.
- Demonstrate the ability to make connections between concepts across biology.
- Communicate effectively in writing.
- Apply the scientific method to interpret information and draw conclusions.
